

## Bespoke Cube™ Air Purifier

- Room Coverage 53m<sup>2</sup>
- CADR 413m<sup>3</sup>/hr
- Sleep Mode 22dBA
- 3 Way Powerful Purification
- Wi-Fi / Smart Things
- Colour: Beige
- Weight: 11.9kg
- Dimensions:  
(W) 380 mm  
(H) 438 mm  
(D) 406 mm

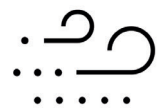

WI-FI / SMARTTHINGS

PET MODE

MULTI-LAYERED  
PURIFICATION SYSTEM

WINDFREE™

### Wi-Fi Control with SmartThings app

Monitor and control the air quality in your home from anywhere using the SmartThings App. With a touch, or using your voice you can turn it on/off, check the air quality, get filter status and replacement notifications.<sup>1</sup>

### Pet Mode

The Pet Mode<sup>2</sup> is designed to remove fine, soft pet hair from the air. It automatically increases the air flow of the Low setting by 20%, so that hair is captured effectively.<sup>3</sup> Its incredible/reliable performance<sup>3</sup> helps you breathe cleaner air.

### Multi-Layered Purification System

A Double Pre-Filter helps capture fine, soft pet hair and large dust particles. Activated carbon-based Pet deodorisation filter helps reduce unpleasant odours<sup>4</sup> while HEPA filter helps remove ultrafine dust (up to 99.97% of 0.3µm dust)<sup>5</sup>

### WindFree™

WindFree™ mode helps purify your space with less noise<sup>6</sup> and no direct wind. Clean air is gently and quietly dispersed across the room with “still air”<sup>7</sup> without the feeling of a cool blast.

<sup>1</sup> A Wi-Fi connection and compatible phone is required. For interoperability through SmartThings, all the devices should be registered with a single Samsung Account. Voice control supported in 8 languages (UK English, US English, Korean, Chinese, German, French, Spanish, Italian).<sup>2</sup> Only available in Pet Support models. <sup>3</sup> Based on internal testing, compared to air low on Smart Mode. <sup>4</sup> Based on testing compliance with the deodorization efficiency standard of the Korea Air Cleaning Association (Model tested AX53A9379WGD) and odour removal efficiency tested by Intertek (Model tested AX350A9350G/AA). Results may vary depending on the actual usage conditions. <sup>5</sup> The filter media has over 99.97% dust collection efficiency, based on a particle size of 0.3µm, tested in accordance with the Korea Conformity Laboratories filter test. Test conditions: temperature 23±2.0°C, humidity 45±2.0%, Test flow rate 5.34 cm/s, test aerosol Sodium Chloride (NaCl). <sup>6</sup> Based on internal testing, comparing WindFree mode (22dB) with High Speed mode (50dB). <sup>7</sup> ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) defines “still air” as when the velocity of air is below 0.15m/s, so people cannot feel any cold drafts.
