

BESPOKE JET BOT™

- Remote Monitoring
- 0.2L (Bin) & 2.5L (Bag) Dust Capacity
- Clean Station
- Misty White
- 210min Charging Time
- Weight: 4.4kg
- Dimensions:
(W) 305 mm
(H) 525 mm
(D) 450 mm

AI OBJECT
RECOGNITION

CLEAN STATION

JET LIVE HOME MONITORING

INTELLIGENT POWER CONTROL

AI Object Recognition

Clean safely and efficiently. Jet AI Object Recognition technology identifies and classifies different types of objects and furniture¹, mapping their locations. Jetbot will then clean closely around items, keep a safe distance from fragile objects or avoid anything dangerous².

Jet Live Home Monitoring

Control and monitor Jetbot anytime, anywhere with Wi-Fi control. Using the SmartThings App⁶, you can remotely schedule it to clean selected rooms or set no-go zones. You can also monitor where it's cleaning in real time and check on your pets or what's happening in your home by using Jet Live.

Clean Station

Enjoy a convenient and hygienic way of emptying your dustbin every 1-3 months³. After cleaning, the Jetbot automatically returns to the Clean Station, which removes dust⁴ using "Air Pulse" technology. In addition to this, a multi-layered Filtration system traps 99.999% of fine dust⁵. Clean Station included in the box.

Intelligent Power Control

Clean hard floors and carpets thoroughly. Jetbot's Intelligent Power Control⁷ identifies the type of surface and amount of dust. Then it automatically adjusts the suction power to clean it thoroughly. So it increases the suction power to clean deeper into carpets with power control technology.

1. Example items: air conditioner (stand type), refrigerator, TV, washing machine/dryer, air purifier, AirDresser, sofa, bed, bookshelf, table, Bespoke(Refrigerator,Dishwasher), excrement, electrical cable, towel/sock, cup, Glasse cup, bottles, bowl, vase. 2. Object recognition may be affected by an object's shape or the environmental conditions. 3. May vary depending on the amount of dust in actual home environments.

4. Results may vary depending on individual use. Dust and hair stuck inside the grille may not be removed with a single cycle. 5. Based on internal testing, using Max mode, in accordance with the IEC62885-2 CL 5.11 standard. Results may vary depending on the actual home conditions. 6. Available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required. 7. Intelligent Power Control is only available in Smart mode.
